AUMUND supplies numerous machines for Argentinian cement plants

AUMUND Brazil and AUMUND China joined forces and worked closely with Sinoma Tianjin TDI to claim two orders in succession for the AUMUND Group of Companies from South America.

AUMUND will supply three chain bucket elevators, eight belt bucket elevators, five pan conveyors and a drag chain conveyor for the construction of L’Amali Line 2 at Loma Negra Companía Industrial, the leading cement producer in Argentina. The order package will be rounded off with 19 silo discharge gates which will be installed under the clinker silo to feed the pan conveyors located there. Loma Negra awarded AUMUND the order in August 2017 to build a second kiln line with a capacity of 5,800 tpd at the L’Amali Plant in Olavarría in Buenos Aires Province. The new line, which will produce 2.7 million tonnes of clinker per year, will be located adjacent to the existing kiln line. Production will start early in 2020.

In June 2018, AUMUND Beijing was able to conclude another successful project in Argentina, together with AUMUND Brazil and Sinoma, to supply four belt bucket elevators, three chain bucket elevators and three pan conveyors via Sinoma TDI to Cementos Avellaneda. Cementos Avellaneda belongs to the Brazilian Votorantim Group and Spanish Molins.

Traditionally AUMUND Brazil has had good working relationships in the oligopoly of cement production in Argentina.
